

SYMPOSIUM

Instrument reprocessing goes LEAN – Can we learn from the LEAN Philosophy in the industrial world?

Latest Trends and Thoughts in CSSD workflow and Quality Management

06th March 2019, Aarhus | 07th March 2019, Copenhagen

Dear Colleagues,

We are all under pressure to deliver cost efficient and fast processes but at the same time we have to ensure patient safety on a highest level. The workflow of a modern CSSD is highly complex and internal and external interfaces represent additional challenges.

In our symposium we aim to discuss a broad spectrum of ideas and experience, how to improve the organization, especially with regards to Lean Management. These techniques brought industry operations a large step forward by focusing on value, simplification, standardization and quality.

Our focus shall be practical experience and strategies, mistakes and lessons learned, which shall help you to develop ideas to improve your own processes.

We look forward to welcoming you in Aarhus and Copenhagen,
Your Faculty Team

PROGRAM

14:00 Reception | Snacks & beverages

14:25 Welcome

Joan Heise, B. Braun Medical A/S

14:30 LEAN Philosophy in Workflow Design

Richard Wood

- Introduction into LEAN Philosophy and Workflow planning (Value stream etc)
