

PRODUCT DATA SHEET

Askina® Barrier Film Swabs

Prevention, Skin Protection, Stoma Care Accessories

Askina® Barrier Film Swabs are sterile and single packed. Thanks to the swab format the application is easy and can be done very precisely.

As the Askina® Barrier Film Spray the swabs are a no sting and rapid drying and provide a breathable skin barrier designed for stoma and wound care use:

To prevent skin breakdown caused by friction or moisture

- Protection of vulnerable areas: heels, elbows, toes, hips – from the first signs of reddening caused by friction
- Protection of incontinent patients' skin

To protect skin at risk from maceration and excoriation

- Periwound skin
- Peristomal area
- Round fixation sites for drainage tubes and external catheters

To maintain the integrity of newly healed skin to stop secondary breakdown

Advantages

Askina® Barrier Film Swabs are easy, sterile, precise and safe to use:

- Completely sting free, can be used on damaged skin
- Rapid drying < 30sec
- Transparent: allows skin control

- Offers 3 days protection
- Easy to remove
- Improves the adhesiveness of dressings and fixation tapes
- Does not reduce the effectiveness of incontinent pads
- Does not interfere with the adhesiveness of stoma appliances

Patient's main benefit in stomacare:

- Less pain during pouch removal
