

Optilene® Silver Mesh Range

First polypropylene meshes with embedded silver ions, designed to prevent material contamination in hernia repair procedures

Antimicrobial Action of Silver

Effect on Meshes: Prevention of Biofilm-formation

Picture shown for illustration purpose only

Incorporation of particles containing **SILVER** to polypropylene meshes

To help to **REDUCE** the risk of
MICROBIAL COLONIZATION
and **BIOFILM FORMATION**
on the surface of the mesh.

The antimicrobial properties of silver ions within Optilene® Silver Mesh LP and Optilene® Silver Mesh Elastic are intended to help to reduce the risk of microbial colonization and biofilm formation on the surface of the mesh.⁵

"In vitro" tests have demonstrated that Optilene® Silver Mesh LP and Optilene® Silver Mesh Elastic show antimicrobial activity against various organisms, including *Escherichia coli* and Methicillin resistant *Staphylococcus aureus* (MRSA).⁵

Optilene® Silver Mesh Range

Optilene® Silver Mesh LP & Optilene® Silver Mesh Elastic

Optilene® Silver Mesh LP

Material: Polypropylene (PP) with max.
125 ppm of Ag⁺

Tensile Strength (Ø): Lon: ≥ 40 N/cm, Trans: ≥ 20 N/cm

Weight: 36 g/m²

Pore size (Ø): 1 mm

Ordering Information Optilene® Silver Mesh LP

Dimension	Art. No.	Units/Box	Shape
Hole/Tails 4.5 x 10 cm	1265360UNI	1 pc.	
	1265360	5 pc.	
Hole/Tails 6 x 14 cm	1265340UNI	1 pc.	
	1265340	5 pc.	
5 x 10 cm	1265350UNI	1 pc.	
	1265350	5 pc.	
7.5 x 15 cm	1265330UNI	1 pc.	
	1265330	5 pc.	
10 x 15 cm	1265320UNI	1 pc.	
	1265320	5 pc.	
15 x 15 cm	1265310UNI	1 pc.	
	1265310	5 pc.	

Indications

of the Optilene® Silver mesh range

Indications Optilene® Silver Mesh LP

Re-inforcement material in connective tissue weakness for:

- Inguinal hernia repair
- Primary ventral hernia repair
- Incisional hernia repair

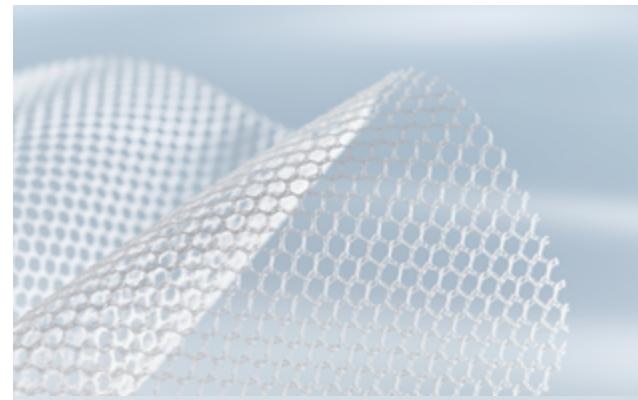

Indications Optilene® Silver Mesh Elastic

Re-inforcement material in connective tissue weakness for:

- Inguinal hernia repair
- Primary ventral hernia repair
- Incisional hernia repair
- Prevention of incisional hernia used as a prophylactic mesh in high-risk patients according to the professional criteria (such as but not limited to: age, nutrition, body mass index, comorbidities, etc.)

Product Features of the Optilene® Silver mesh range

- For open and laparoscopic procedures¹
- Light-weighted mesh²⁻³
- Adapts to the longitudinal and latitudinal motion of the patient⁴
- The antimicrobial properties help to reduce the risk of microbial colonization and biofilm formation on the surface of the mesh⁵
- Decrease bacterial adherence with releasing silver ions⁵
- MRI scans safe⁶
- Prophylactic use reduces the risk of incisional hernias in patients treated with Optilene® Silver Mesh Elastic⁷

Optilene® Silver Mesh Elastic

Material: Polypropylene (PP) with max. 125 ppm of Ag⁺

Tensile Strength (Ø): Lon: ≥ 25 N/cm, Trans: ≥ 25 N/cm

Weight: 48 g/m²

Pore size (Ø): 3.2 mm

Ordering Information Optilene® Silver Mesh Elastic

Dimension	Art. No.	Units/Box	Shape
7.5 x 15 cm	1265250UNI	1 pc.	
	1265250	5 pc.	
10 x 15 cm	1265240UNI	1 pc.	
	1265240	5 pc.	
20 x 30 cm	1265220UNI	1 pc.	
	1265220	5 pc.	
30 x 30 cm	1265210UNI	1 pc.	
	1265210	5 pc.	
15 x 15 cm	1265230UNI	1 pc.	
	1265230	5 pc.
